

The main Filmop mission is to design and create the best "cleaning systems" to satisfy all the needs in the cleaning market, without forgetting the wellbeing and health of people and the full respect of the environment while introducing any new project.

# Filmop, an Italian worldwide leading company in the professional cleaning

Filmop was founded in the early 70s with the aim of specializing in the manufacturing of manual cleaning equipment for professional use.

Situated in the main production areas in the north-east of Italy, Filmop is a leading company in the professional cleaning and a reliable partner for thousands of professional people who operate in this market, proud to develop the **"Made in Italy"** trademark all over the world.

This is the real reason why Filmop has decided to design, plan and produce its own products from the beginning of its activity till today only and exclusively in Italy.

Filmop plant is about 30.000 square meters, including warehouses for storage of finished and semi-manufactured products, administration, sales and purchases offices, production and assembling departments, a laboratory for research and development.

Filmop exports to more than 80 countries all over the world very very quickly and with the highest reliability and efficiency. It has a French branch and an American branch (since 1997 and since 2004 respectively).

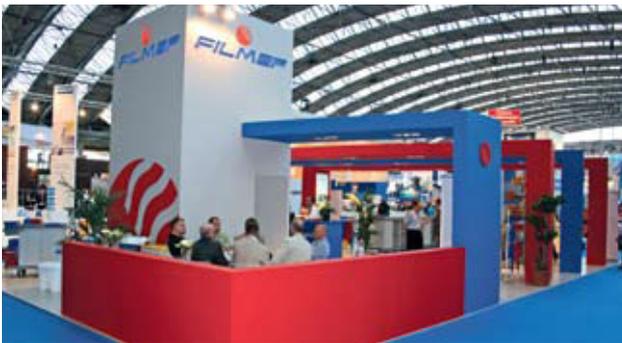

## Mission

Filmop has always been inspired by the following main principles, that have surely helped its growth and development:

- » a constant attention to the customer's needs
- » an important spur to innovation and research
- » no equal production flexibility
- » a quick order processing with very quick deliveries without delays

The main Filmop mission is to design and create the best "cleaning systems" to satisfy all the requests and needs in the cleaning market, without forgetting the wellbeing and health of people and the full respect of the environment while introducing any new project.

# Your trusted partner

Filmop is not just a supplier of cleaning tools. Filmop is a “trusted partner” totally oriented towards customer’s satisfaction.

People choosing Filmop know they can count on a qualified, available and efficient partner, with the right organization to quickly ship orders with fast and on-time deliveries.

But the added value of the company is without doubt its manufacturing flexibility. At every new request from customers there follows an immediate and careful research by the R&D department to identify and develop the “best solution”.

Moreover, Filmop guarantees the best pre- and post-sale customer service, advising and guiding its customers while making their own choice for the cleaning system mostly fitting their own needs and supporting them with trainings on-site or at the company itself and/or with inspections at cleaning yards.

And the company website is a further tool available to users, with detailed and updated information on Filmop product range, technical sheets, catalogue downloading, etc....

Filmop is a trusted partner totally oriented towards customer’s satisfaction.

Filmop has developed technical, organizational and manufacturing skills which have allowed it to reach high quality standards, both from a company and a product standpoint.

# Filmop certifications

In 40 years of activity Filmop has developed technical, organizational and manufacturing skills which have allowed it to reach high quality standards, both from a company and a product standpoint.

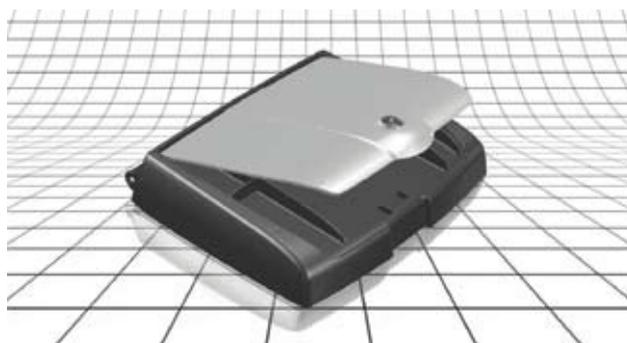

The quality of products and services offered by Filmop is guaranteed by the following certifications:

**Quality Certification ISO 9001-2008** (since the year 2000): that is, an organized company system with an efficient management, right structures and adequate competence, which are a guarantee of reliability for customers, suppliers, employees and partners.

**"BRC GLOBAL STANDARD CONSUMER PRODUCTS" CERTIFICATION** (since 2006): a management and organization system to check hygiene and product security.

**Environment Certification UNI EN ISO 14001** (since 2011): Filmop has decided to carry out its own environment management system to keep the environmental impact of its own activities under control, constantly searching for improvements in a coherent, efficient and above all sustainable way.

On top of that, the company satisfies the requirements of the European certification **REACH** (since 2007): it purchases raw materials only from trusted and qualified suppliers, who declare to respect and follow the current laws concerning the supply chain.

# Filmop engagement towards environment preservation and sustainable development

In an age in which the preservation of our environment is the world top priority, Filmop is strongly engaged and oriented in a policy of sustainable development.

Sustainable development is a process of change finalized to improve environmental, economic, social and institutional conditions of nations. This process implies an exploitation of natural resources, a direction of investments and an orientation of technological development totally respectful of the the needs of today and future generations. This is why sustainability implies four fundamental issues:

- » **Economic sustainability:** seen as capacity to produce incomes and jobs to feed the population;
- » **Social sustainability:** seen as capacity to guarantee conditions of human welfare (safety, health, schooling) which are equally distributed per classes and genre;
- » **Environment sustainability:** seen as capacity to maintain quality and renovation of natural resources;
- » **Institutional sustainability:** seen as capacity to assure conditions of stability, democracy, participation and justice.

Filmop's contribution towards sustainable development finds fulfilments in its engagement to:

- » **value each person as a human being:** the company has a modern and avant-

garde structure with wide offices featuring individual booths and working tools, respecting healthcare laws, bright warehouses and industrial machines in compliance with workers' safety. Moreover, Filmop is fighting against the exploitation of minors' work and is proud to employ disabled people and people with long term seniority (15 – 20 years);

- » **environment protection:** today, compared to the past time, we have the means and the knowledge to make conscious choices for environment preservation. Favouring products which respect E.U. laws and manufactured by certified companies can really make the difference.

This is exactly what Filmop is doing: purchasing top quality and non-pollutant raw materials from trusted and qualified suppliers (in compliance with REACH certification), projecting long lasting, fully recyclable and ergonomic products, organizing carefully and efficiently the collection of wastes and leftovers from manufacturing processes, getting almost totally self-sufficient in terms of energetic consumption for the mop production (a 175 kwp photovoltaic plant has been functioning since 2011; this means a reduction of 140.000 tons of CO<sub>2</sub> in one year).

Filmop's contribution towards sustainable development finds fulfilments in its engagement to value each person as a human being and to protect environment.

Innovation, Research and Development are the keywords that have contributed to Filmop growth.

# A complete range of products... and many successes

Innovation, research and development are keywords that have contributed to Filmop growth; this company situated in Veneto, in the north-east of Italy, has always been successful thanks to its capacity to feel, get, understand and anticipate the requests and needs in the market; this is what differentiates a leading company from all the other ones operating in the same field.

Since its establishment Filmop has always been investing a lot in new technologies, thus being one of the main figure in the changing process in the professional cleaning field during the last 30 years.

It was the first Italian company with a special attention to:

- » **an alternative to metal materials**, such as polypropylene, very strong, light and completely recyclable
- » **a separation between clean water and rinsing water**, fundamental issue for a professional cleaning
- » **ergonomic cleaning systems** in order to make easier and improve the working conditions of the operators in the cleaning field

These three main concepts have been the basis and foundation of a successful company and of a production policy which has developed a complete range of products for professional cleaning with more than 4.000 finished items.

# Filmop... advises

Filmop products are high-quality products, resistant, strong, recyclable and ergonomic beyond doubt, they are the result of a careful and accurate research and selection of raw materials.

Any product has to be used in the right and proper way in order to last longer and to keep its main features and performances as much and as long as possible.

As far as all textile products are concerned, please, follow very carefully the washing instructions here below:

- » follow carefully the washing instructions on the packaging of detergents before washing;

- » do not use softner;
- » do not use chlorine or bleach;
- » do not use alkaline detergents, PH >11;
- » in case of microfiber, please, always pre-wash the mop in cold water to remove any detergent/disinfectant leftover

Please, visit our web site [www.filmop.com](http://www.filmop.com) or consult our product sheets, asking for them to our sales staff, for further and more details.

The screenshot displays the FILMOP website interface. At the top, there is a navigation bar with the FILMOP logo and the text 'Industrial Cleaning Equipment'. Below this, a search bar and a language selector are visible. The main content area is divided into several sections:

- Product reference number:** 0002144DA
- Description:** RAPIDO MICROFIBER MOP HEAD 41X10 CM WITH BLUEVELCRO
- Product Datasheet:** RAPIDO blue micro-supported microfiber mop head 41x10 cm for velcro supported frames. Applications: Mainly used for wet mopping and disinfection in medium duty floors. Suggested for cleaning inside floors (hotels, houses, offices, hospitals, etc.). Features: \* Thanks to its structure, the microfiber soaks up more dirt to its yarn capillary and it grants a wider cleaning area. \* Thanks to a particular knitting process, this knitted yarn keeps its shape even after many washing cycles with low losing. \* Velcro support fil is an innovative unbreakable material which is non-losing and does not lose keeping its characteristics unstained. \* Available in the size 41, 51, 61 and 101 cm. \* Available also with red, yellow and green velcro support.
- My wishlist and download:** A section for users to log in and download product PDFs.
- Download of selected product:** A list of available downloads including 'PRE-SPRINKING CATALOGUE', 'General Catalogue', and 'Export as pdf of product file'.

# General product safety

Ref. the Legislative Decree No. 206 of 06.09.2005 "Codice del consumo a norma dell'articolo 7 della legge 29 luglio 203 n. 229" and following integration modifications concerning product safety: it's the company's duty to put safe products on the market.

In order to do this we advise what follows:

- » no use by non-professional users;
- » no use by children;
- » no use on uneven surfaces and grounds (with slope over 1%)

The manufacturer is not responsible for damages caused by chemical products or other substances used by the end-users.

# Compliance Declaration

All Filmop products are in full compliance with the laws in force regarding safety and are covered by an insurance policy on the "Civil Responsibility of Products".
