

# HEAT RESISTANCE

**UNIMOP** "Quality without concession"

In 1970, Unimop started the sale of products for the professional and institutional cleaning industries.

In the late 1980s, this market required special products for food processing kitchens and industry. This development prompted Unimop BV to offer high-quality products to meet the industry's needs.

Unimop BV stands for development and improvement in collaboration with its customers and suppliers.

**UNIMOP** "concepts in cleaning"

**Products**

Unimop BV provides products for professional cleaning and institutional cleaning. Besides Hyline, our range of hygiene brushes, we also offer brushes under the customer's private label. Of course this is done in consultation with the customer and requires some preparation.

Making your job so much easier...

Designed to withstand temperatures up to 250° celcius.  
So you can clean when and where you want!

**Do you have a brush which is more heat resistance than the normal PBT brush and which can stand more than 134°C?**

Unimop has now hygiene brushes which can stand up to 134 °C, 180 °C and brushes which can even stand up to 250 ° Celsius!

Our hygiene brushes have an extra high heat resistance filament, for cleaning ovens when they are still hot.
